Projects

Grocery Store Website

https://github.com/Gaurav4045/websiteproject
Developed a user-friendly grocery store website using HTML, CSS, JavaScript, Bootstrap, and Django. Features include browsing, searching, filtering products, adding items to the cart, and secure checkout. Integrated Django for server-side functionalities and database management.

Social media app

Designed and built a social media platform using React and Appwrite. The platform allows users to register, create profiles, post updates, Follow other users, and interact through comments and likes. Used Appwrite for authentication, database, and file storage services, ensuring Smooth and scalable backend.

Strengths

Creative Problem Solving
Utilize innovative solutions to tackle
challenges effectively.

Effective Communication
Strong ability to collaborate and articulate
ideas clearly within teams.
